# 1 Litre Whistling Kettle

Information for use \_\_\_\_\_

## **Intention For Use**

Thank you for purchasing your 1 Litre Whistling Kettle from Streetwize Leisure.

Before inflating and using this Whistling Kettle, we strongly advise that you read all the information and guidelines in this document.

## Health & Safety Guidelines

- NOTE: The kettle can be used on gas hobs or real flames.
- When used on a real flame, take extra precaution as the sides can get hot.
- When used on a real flame, take care, as the flame can cause discoloration to the kettle.
- When used on gas hobs, the handle can get hot.
- Either leave the kettle for 30 seconds before pouring water or wear oven mitts or something similar when handling.
- Never leave the kettle to boil unattended, as it could boil dry, which could lead to damage or fire.
- When used on gas or any real flame, ensure that the kettle is placed directly over the flame and that the kettle is at least the same size as the hob; otherwise, the flame could rise up the side of the kettle and cause damage.
- These kettles can only be used on a gas hob or real flame due to the aluminium base. Please do not use them on an induction hob, as this could cause damage to the base.
- Please keep these instructions, the sales receipt, and, if possible, the carton with the inner packaging.
- This product is not intended to be used by persons (including children) with reduced physical, sensory, or mental capabilities or lack of experience and knowledge, unless they have been given supervision or instructions concerning the use of the product by a person who is responsible for their safety.
- The manufacturer is not liable for any harm or injury brought about by the product if you disregard the safety instructions.
- The product must be placed on a stable, level surface.
- The user must not leave the product unattended while it is in use.
- This product gets hot during use and takes time to cool down. Do not touch hot surfaces. Use handles or knobs.
- During use, any area of the kettle may get hot. Be careful when handling the kettle at all times.
- Never heat an empty, overfilled, or underfilled kettle.
- The kettle has a whistle function. You should never rely on the whistle to remind you about an unattended kettle. The whistle is a convenience, not a safety device.
- We advise using oven mitts or something similar when handling the kettle during and after boiling.
- Do not tip the kettle upside down when pouring.
- Allow the kettle to cool thoroughly before refilling. Never re-fill a hot kettle with cold water.

## Intention For Use

- Fill the kettle with water, place it on top of the heat source and turn it on.
- Once the kettle starts whistling, turn the heat source off.
- Open the sprout and pour water where required.

**Important:** The water coming out of the spout will be extremely hot so be careful when pouring.

## Care & Cleaning

- Wash with warm, soapy water.
- If mineral deposits are detected, you can minimise them by boiling water on medium heat with a small amount of vinegar. Once boiled, repeat a couple of times, then clean and rinse.
- Hand wash only, not to be washed in a dishwasher.
- Never use harsh or abrasive cleaners or brushes when cleaning this product, as the coating or finish may be damaged when doing so.

## Storage

- To help keep your product looking newer for longer and prolong the life and use of the product, we recommend that the product be covered when not in use.
- If the product is not going to be used for an extended period (such as a winter period), we recommend that it be carefully folded away and stored in a clean, dry, and free from damp location.

## Technical Support

If you require any technical support for your product within the warranty period, please contact us on [support@streetwize.co.uk](mailto:support@streetwize.co.uk) and provide the product name and supplier code (see Technical Specifications) along with the technical query and proof of purchase.

## Technical Specification
