

Folding Parking Post

Fitting Instructions:

Post measurements
Diameter: 60mm Height: 700mm
Base plate - 130mm x 150mm
Bolt hole size - 12mm x 4

Bolt Types: Choose the correct bolts for the surface you are fitting the parking post to ie: concrete/tarmac. 4 concrete bolts are included, but if you require tarmac bolts these will need to be purchased separately. Check diameter of bolts required.

Concrete bolts (included)

Tarmac bolts (NOT included)

1. To lock/unlock, place the key in the lock and turn anti-clockwise.

2. When the bolt pops out of the lock, lift the post to lay it down, reverse this process to lock.

3. Mark and drill holes in floor. Allow enough room for clearance when using the parking post.

4. Lay post flat with base over holes and use correct bolts to secure in place. Use the key to lock & unlock the folding parking post.
