Product Elements

- Streetwize Titan High Rear Mount 3 Bike Carrier
- Safety bar
- Spanners (x2)
- Nuts & washers

Assembly Instructions

1. Take out all the contents out of the packaging. On the cycle carrier frame, carefully remove the protective wrapping from the strap buckles.

Warning: Please take caution when handling the strap buckles. Risk of injury.

2. Position the safety bar on the frame via the pre-drilled holes as shown in Figure 1.
3. Use the supplied nuts, bolts and washers to fix the bar in place. Please make sure you use a washer on either side of the bolt. And use the supplied two spanners on either side to secure the bolt and nut in place (see Figure 2). Alternatively, you can use a 10mm socket wrench.
4. Once the bar is securely in place, take the carrier to your vehicle and then fully unravel all the hook straps that are already pre-inserted into the strap buckles.

Mounting the Cycle Carrier

Important: It is highly advised that two people are involved in mounting the cycle carrier to your vehicle.

1. Depending on the shape of your vehicle's boot door, you can either mount the bike carrier upright as shown in Figure 3, or the other way around with carrier clips rotated

Fig 3

- Adjust the angle of your cycle carrier to suit the rear of your vehicle. You will need to rotate the knob anticlockwise on both angular fixing clamps to adjust the angle. Then rotate the knob clockwise to secure in place (Figure 4).

Fig 4

- To mount the cycle carrier, the hook straps will need to be secured on your vehicle's boot door. The top two hook straps should be secured on the top of the boot door, both side hook straps should be hooked on either side of the door. And the bottom two hook straps at the bottom of the door. Figure 5 illustrates the hook-up points on your vehicle's boot door.
- Hook the straps of the carrier onto your vehicle's boot door as shown in Figure 6 & 7. You need to open the boot door in order to get the hooks in.
- Then tighten each strap for a secure hold (Figure 8).

Mounting your bike

- Once your cycle carrier has been securely mounted onto your vehicle, you can then mount your bike via the carrier clips.

Please note, this bike carrier is suitable for carrying bikes that have a straight horizontal bar across the top of the frame. Bikes with a curved frame or don't have a straight horizontal bar are not compatible with this cycle carrier.

- When mounting the bike, place the top bar of the frame of your bike into cycle carrier clips, and then secure the strap around the clip as shown in Figure 9. Figure 10 shows the bike once mounted.
