

# Solar Lotus Floating Lights (Pack of 3)

Thank you for purchasing these Solar Lotus Floating Lights from Streetwize Garden. The instructions written below provide you with guidance on how to get the best use out of the product. We highly recommend reading these instructions before using the product.

# Assembly Instructions

Remove the protective film from the solar panel.

---

## Charging & Operation

These solar lotus lights come with a solar panel situated at the top. During the day, the panel absorbs solar energy to charge the included rechargeable battery. At night, the LED light automatically illuminates.

**Before using this product for the first time, we advise that you fully charge the battery by placing the lotus lights under direct sunlight for a full 24-hour period.**

### Turn On:

1. Locate the green plastic base on the lotus.
2. Twist the base counterclockwise to access the on/off switch.
3. Slide the switch to the “on” position.
4. Replace the cover.

### Solar Charging:

- Place the lotus light in direct sunlight for at least 8 hours.

### Automatic Operation:

- **Daytime:** The light will automatically charge in direct sunlight.
- **Nighttime:** The light will automatically illuminate.

**NOTE:** For optimal performance, ensure the solar panel is clean and unobstructed. To test the light simply cover the solar panel with your hand and the light should turn on automatically.

---

## Important

1. Install the solar product in an area where it can get direct sunlight.
2. Leave the switch to the “ON” position.
3. Place the solar light in a location that is away from other light sources at night, such as street lights. Artificial lighting may prevent the product from turning on automatically at night.
4. Duration of solar light illumination depends on the solar product’s level of sunlight exposure, geographical location, weather conditions and the hours of daylight.

## Maintenance & Troubleshooting

1. Make sure the switch is set to the “ON” position.
  2. Keep the solar panel clean.
  3. If a solar product does not light up after it has been used for around 8 – 12 months, replace the rechargeable battery as it may be weak or worn out. (Battery 1 pc AAA 1.2V 150mAh, Ni-MH Rechargeable). Never use another battery with a different spec.
- 

## Health & Safety

- Do not use the device if the insulation or bulb are damaged.
  - Never allow the product to come into contact with excessive heat or naked flame.
  - This product is not intended for use by children or individuals with reduced physical, sensory, or mental capabilities unless supervised by a responsible adult. Small parts may present a choking hazard. Always keep out of reach of children.
  - When disposing of this product, please do so in line with your local authority guidelines.
- 

## Battery Replacement

1. Unscrew the battery compartment cover by using a Phillips head screwdriver (not included).
2. Remove the exhausted battery and install 1 pc AAA 1.2V 150mAh, Ni-MH rechargeable battery according to the +/- polarity. Open the compartment carefully and ensure that wire inside the battery terminals is not damaged.
3. Replace battery compartment cover, screw it back into position and make sure is properly sealed.

**Attention: Batteries must be recycled or disposed of in accordance with your local authority guidelines. Do not dispose of these near an exposed heat source, an open flame, or in your normal household waste. If you plan to store the product for an extended period, remove the battery from it. Removal or replacement of the battery should only be done by an adult or with adult supervision.**

# Technical Specifications
